♦ PROFILE ♦

Computer Science student (CGPA 9.29/10) at Mahindra University, studying at Centrale Méditerranée in Nice on a student visa. Drawn to the full product life cycle, from user need to launch, with hands-on experience in full-stack web and mobile apps and machine learning, from forecasting to recommendations. Led volunteer teams across three university events. Seeking a 5-month end-of-studies internship in Europe from April 2027 in product, software engineering or NLP; also open to GenAI and IoT.

♦ EDUCATION ♦

Sep 2026 – Aug 2027
CentraleDigitalLab Program
Centrale Méditerranée, Nice, France

Intensive foundation courses and industry projects

Aug 2023 – Aug 2027
B.Tech. Computer Science and Engineering
Mahindra University, Hyderabad, India

CGPA 9.29/10 (until 3rd year) • 2x Academic Scholarship • Final year: Study Abroad Program

Apr 2019 – Mar 2023
AS and A Levels, IGCSE
Reqelford International School, Hyderabad, India

A Levels 87.25%, AS 80%, IGCSE 93.14%

♦ PROJECTS ♦

Jun 2026 – Jul 2026
Tandem
Independent project • React Native (Expo), TypeScript, Supabase

Designed the product and built it with AI-assisted coding: a cross-platform iOS and Android app (Expo Router, Supabase) where groups track movies together, with over-the-air updates via EAS.

Apr 2026 – May 2026
Can Fine-Tuning on Bias Introduce Bias?
Coursework group research project • Python, PyTorch, LoRA, Sentence-Transformers

Studied whether fine-tuning MiniLM with LoRA on StereoSet changes its own representational bias. Probed it on CrowS-Pairs and SST-2 to test the changes in stereotype score and sentiment accuracy.

Apr 2026 – May 2026
Logistics Delivery Service
MongoDB, Express.js, React, Node.js

Developed a platform for parcel booking and live shipment tracking, with driver sign-up and management.

Jan 2026 – May 2026
Peer-to-Peer Tutoring Platform
React.js, Node.js, Express.js, MongoDB, FastAPI, Scikit-learn, PyTorch

Built a full-stack platform with session scheduling, live group mentoring and real-time doubt clarification. Developed the React and Node/Express layers on MongoDB, plus an ML-based learning-pathway recommender.

Nov 2025 – Dec 2025
Day-Ahead Energy Load Forecasting
Python, SARIMA, STL decomposition, machine learning

Built a SARIMA-based day-ahead load forecasting system on Open Power System Data (STL, ACF/PACF; MASE, RMSE, MAPE) with residual z-score and ML anomaly detection, simulated live ingestion and a monitoring dashboard.

Oct 2025 – Dec 2025
Centrality and Herding in Groups
Group research project • Python, Excel

Team study of group decision-making in societal debates, extended to how herding drives marketing, from social media hype waves to movie promotions and celebrity endorsements.

♦ TECHNICAL SKILLS ♦

Programming	Python, Java, C
AI / ML	PyTorch, Scikit-learn, Time-series forecasting
Web	React, Node.js, Express.js, FastAPI, HTML/CSS, JavaScript
Databases	MySQL, MongoDB, Supabase (PostgreSQL)
Tools	Git/GitHub, JIRA, Notion, VS Code, Gephi, Adobe Illustrator

♦ LEADERSHIP & INITIATIVE ♦

Jul 2025 – Dec 2025

Programming Head, ROOTS Fest

Mahindra University, funded by Mahindra and Mahindra

Planned and executed the ROOTS Cultural festival with industry experts, shaping a new initiative for the student audience to reconnect them with art forms of their roots.

Mar 2025 – May 2025

Logistics Head, Étincelle

La Fête de la Francophonie, Mahindra University

Organised the French-language event end to end: assembled and led the volunteer team, ran planning meetings and coordinated mentors and student participants.

Sep 2024 – May 2025

Vice-Marketing Head, Hult Prize MU

Mahindra University

Planned events with the Organising Committee, led promotional content to grow participation, and selected the teams that advanced to Hult Prize Global.

Jan 2024 – Apr 2024

Founder, AURA Handicrafts

Handmade-products venture

Launched and ran a handmade-products venture, owning production, pricing and sales strategy; turned INR 5,000 of starting capital into INR 25,000 in sales (INR 20,000 profit) online and at stalls.

♦ SOFT SKILLS ♦

Leadership	Led volunteer teams and planning across three university events
Problem-solving	Structured ML and forecasting problems and validated them with MASE and RMSE
Creative thinking	Designed handmade products, event marketing content and app interfaces
Team collaboration	Worked alongside organising committees and peers, sharing tasks and progress in JIRA and Git
Adaptability	Relocated to France to pursue a study-abroad program

♦ COURSEWORK ♦

GenAI and LLMs • Deep Neural Networks • Machine Learning • Artificial Intelligence • Applied Time Series Analysis • Modern Cryptography • Software Engineering • Data Structures and Algorithms • Design and Analysis of Algorithms • Operating Systems • DBMS • OOPS

♦ LANGUAGES & INTERESTS ♦

English	Fluent (C1–C2)	●●●●●	**French**	A2/B1, improving	●●○○○
Hindi	Fluent (C1)	●●●●○	**Telugu**	Fluent (spoken)	●●●●○
Tamil	Fluent (spoken)	●●●●○			

Interests Reading • Crochet • Singing • Travel
